Medical Examination and Vaccination Instructions

Now that you are scheduled for an immigrant/K visa interview, please make arrangements to undergo your medical examination and obtain required vaccinations. All immigrant and K visa applicants, regardless of age, must have a medical examination. United States immigration law also requires immigrant visa applicants to obtain required vaccinations (listed below) prior to the issuance of an immigrant visa.

Please arrange to undergo your medical examination at one of the designated panel physicians listed below. Medical examinations conducted elsewhere will not be accepted. A medical examination report will be generated and completed by the panel physician during the exam. Each person who is examined must present his or her own passport and five visa photographs at the time of the exam. Once the medical exam is completed, you will receive a sealed medical report. **Your medical examination must be completed prior to your visa interview date. Contact the panel physician in advance to learn about the projected time frame for processing your medical report to completion. DO NOT open the envelope as you must bring the sealed medical report to your visa interview. NOTE: You must not undergo a medical exam unless an interview is scheduled. The validity of your visa is tied to your medical exam's validity.**

Panel physicians who conduct medical examinations of immigrant and K visa applicants are required to verify that applicants have met certain vaccination requirements, or that it is medically inappropriate for an applicant to receive one or more of the following vaccinations:

DT/DTP/DTaP, Td, Polio (OPV/IPV), Measles (or MR or MMR), Mumps (or MMR), Rubella (or MR or MMR), Rotavirus, Hib (Haemophilus Influenzae Type B), Hepatitis A, Hepatitis B, Meningococcal, Varicella, Pneumococcal, and Influenza. If you have already received some or all of the required vaccinations, you should bring your previous vaccination records to your medical exam for verification and transfer to your international vaccination record. Physicians at the panel sites listed below can determine which of the listed vaccinations are medically appropriate for you, given your age, medical history, and current medical condition. Only vaccinations verified or administered at the panel physician sites will be accepted by the Consulate.
